

GLASS EXPANSE

Premium Slide-and-Stack
Doors & Windows

A Whole New Level
of Open Concept

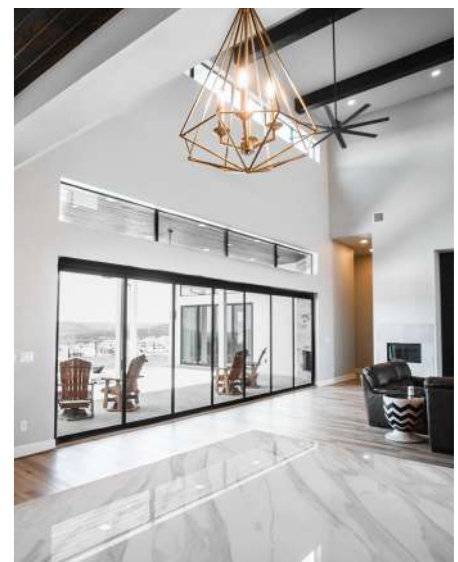

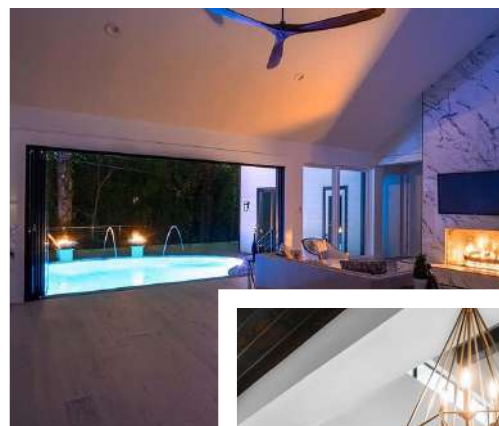

About Us

Glass Expanse has been providing breathtaking views and exceptional service since 2017. We rethink how windows and doors should look in our homes. Our engineers prioritize design to deliver you the sleekest system. We are proud to provide beautiful custom doors and windows that are made in the USA.

What makes us different?

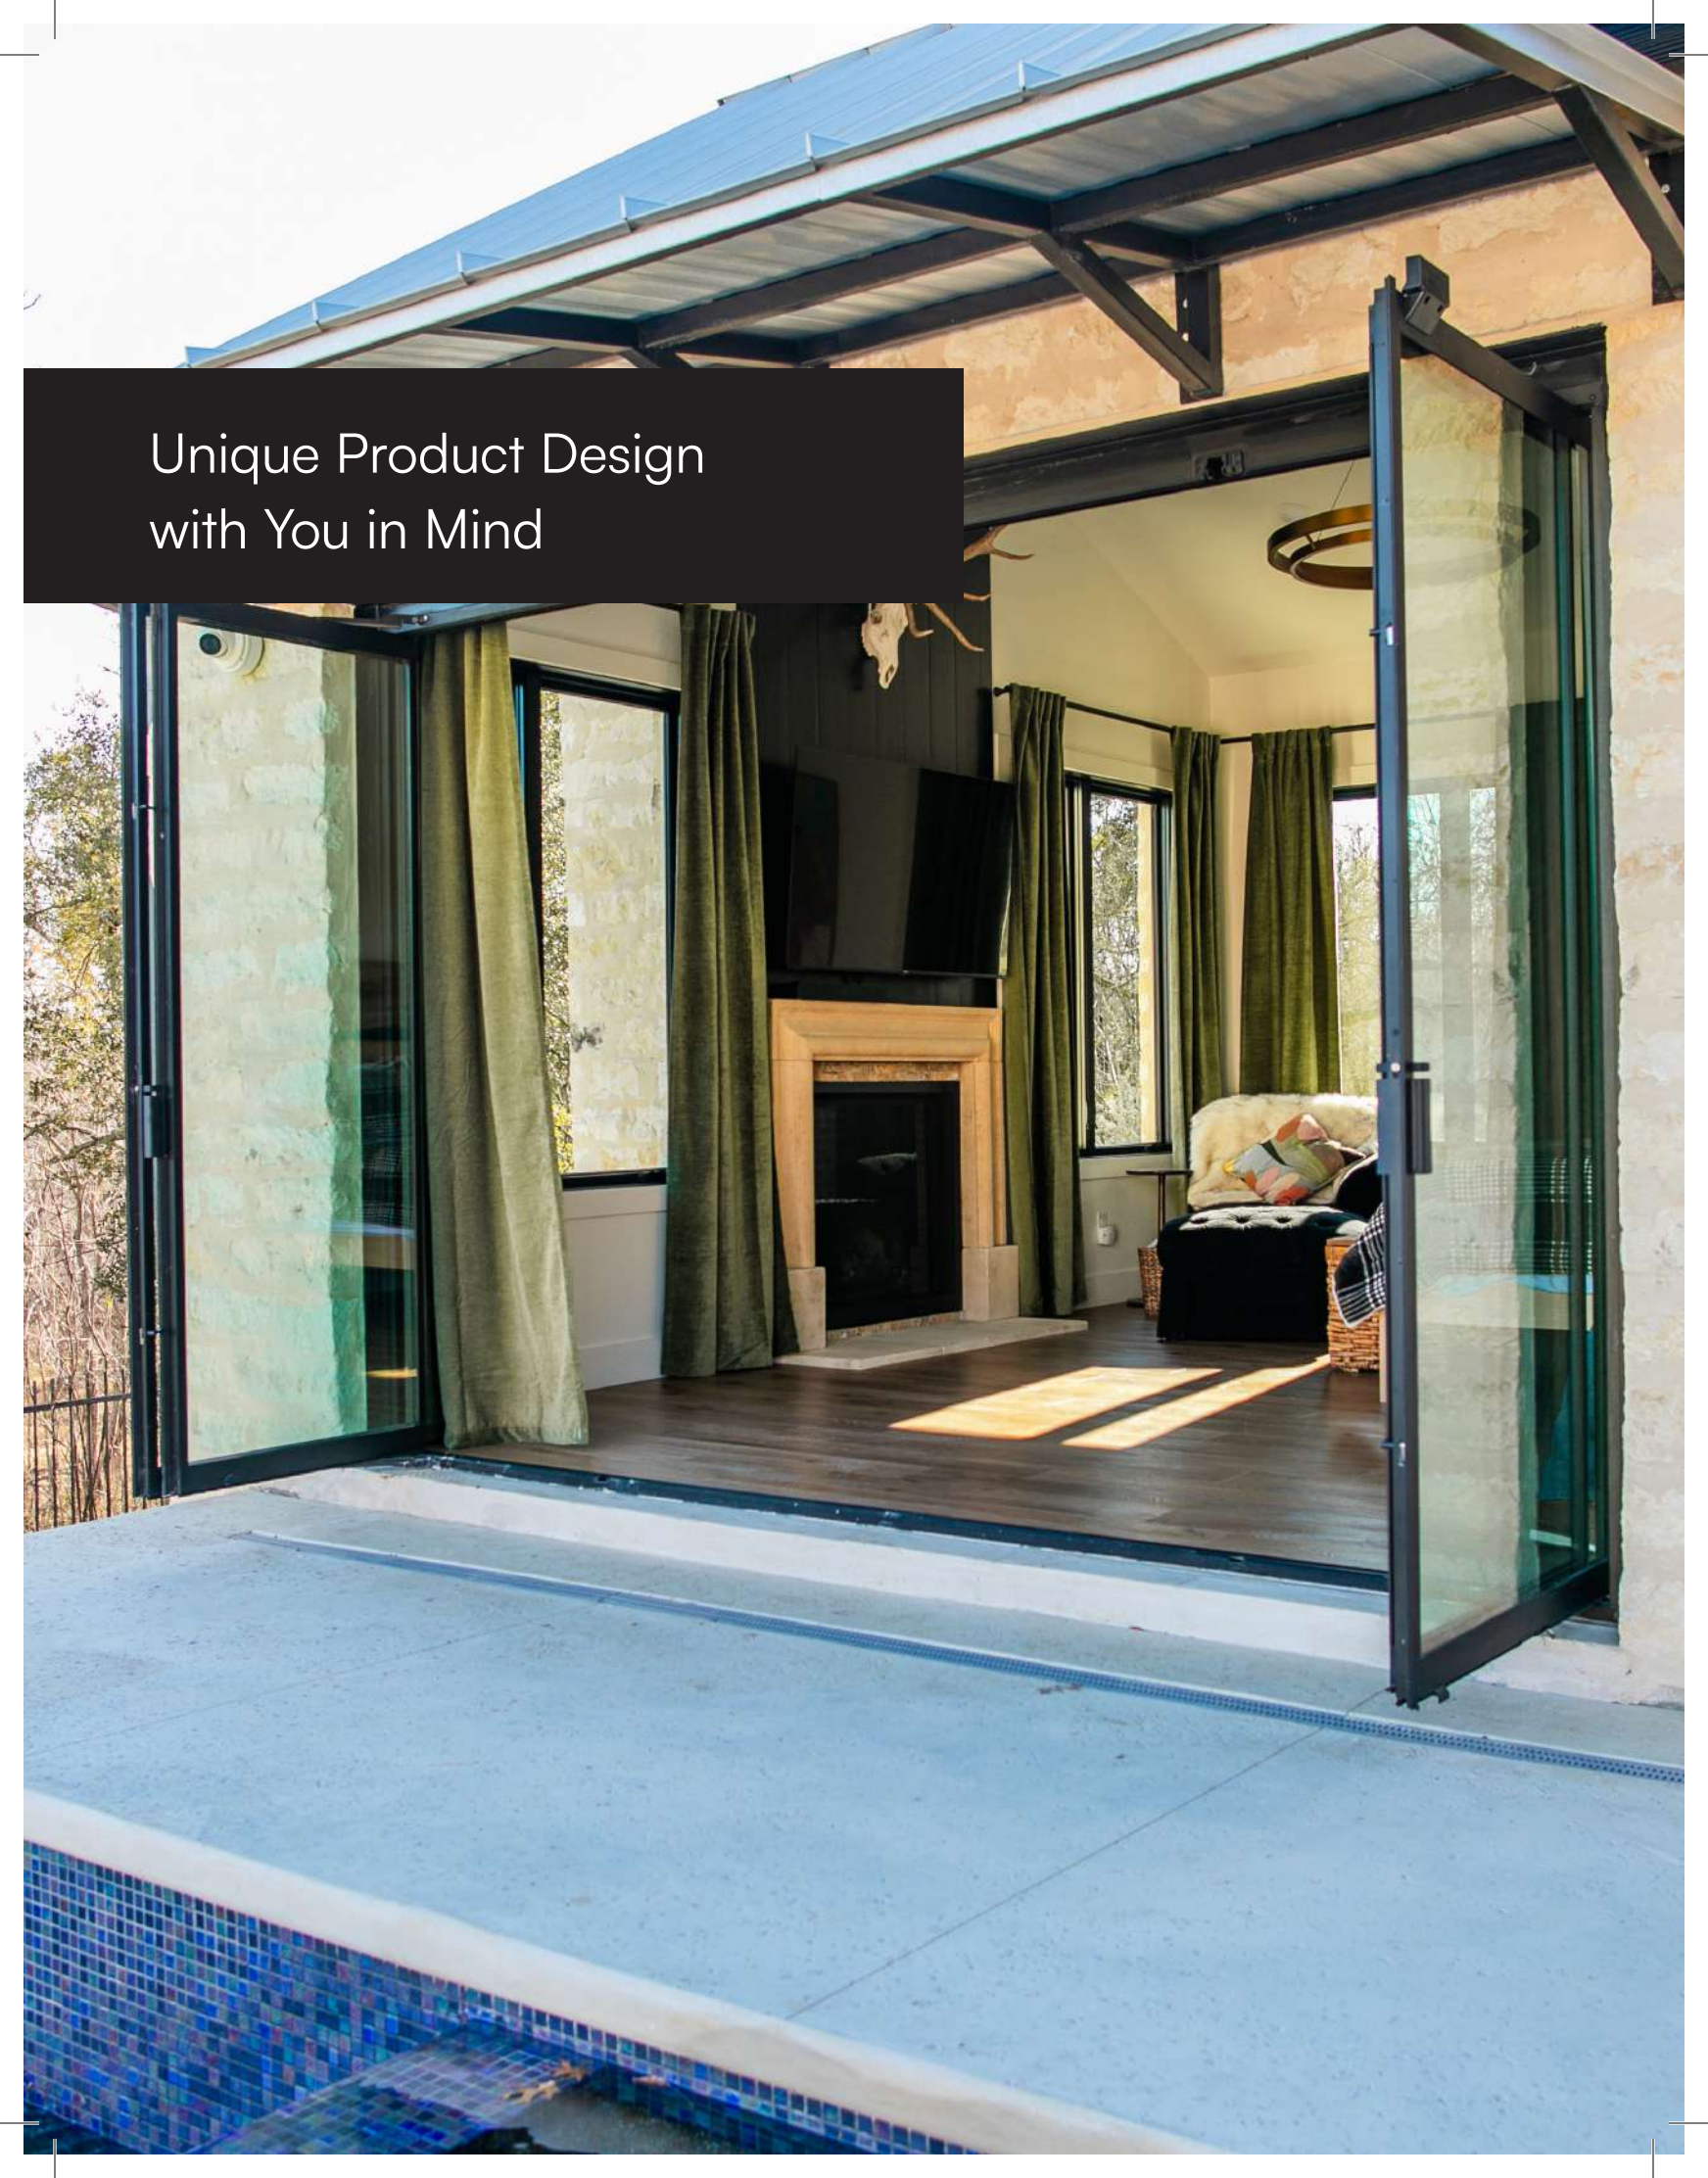

- › Patented hardware developed from a design-first mindset.
- › Slimmest panel frames in the industry for a clearer view.
- › Flexible panels for multiple positions to fit the occasion.
- › Each part has been uniquely engineered and custom-made to give you long-lasting use that won't go out of style.
- › Manufactured in the USA.

GLASS EXPANSE

A photograph of a modern house with large glass doors and windows. The house has a light-colored stucco exterior and a dark metal roof. The interior is visible through the glass, showing a living room with a fireplace, a television, and a sofa. The floor is dark wood. In the foreground, there is a concrete patio and a swimming pool with blue mosaic tiles. The text "Unique Product Design with You in Mind" is overlaid on the left side of the image.

Unique Product Design
with You in Mind

Our Design

Ultra-thin frames go practically unnoticed, so your expansive views can steal the show. We've built our system with a slim lower track, allowing for seamless transitions from room to room. And with independent panels that glide effortlessly across the track, you can feel confident to open an entire wall and bring the outside in — whenever you want.

Even if your home settles and things shift, our system gives you the power to make slight adjustments quickly and easily without calling another contractor.

GLASS EXPANSE

Sleek Functionality
for Expanded Spaces

Our Spaces

Our systems are meticulously hand-crafted to integrate into any space. From patios, office partitions, vacation homes to conference rooms, restaurants, and lounge areas, we have the perfect window and door system to fit your space. We've even had schools reach out to separate classrooms.

Our one-of-a-kind slide-and-stack systems open up any — and every — space. Whether you want them open, shut, or somewhere in between, our flexible system gives nearly unlimited possibilities for opening and closing your space.

Versatility that Brings
Beauty to Any Space

Our Promise

At Glass Expanse, our incredible team loves windows and doors. We genuinely get excited to help make expanding your space fun. You'll love working with us as much as we love opening your home to the world. We feel this is what sets us apart.

We promise:

- > Amazing customer service
- > Easy-to-install, modular systems
- > 10-Year Warranties on all products
- > Made in the U.S.A.
- > Happy customers

GLASS EXPANSE

Our Process

Three simple steps:

1

GET A QUOTE

Fill out the “get a quote” form, and our team will set up a call to discuss your project.

2

WE’LL BUILD AND SHIP

Tell us about your home or project, and we’ll make a game plan for creation. Then, we’ll build and ship them directly to you.

3

SHOW IT OFF

Be prepared to open and close your new doors with every visitor. You’ll love wowing your guests nearly as much as the view.

Scan the QR code to start the process!

GLASS EXPANSE

You've got questions. We've got answers.

At Glass Expanse, our incredible team is here to help you with any questions or concerns you may have. Below are some commonly asked questions and answers.

Who installs the system?

Your General Contractor installs our systems. We have an ever-expanding library of resources that your contractor will have access to after purchasing your system.

Is your product energy efficient?

Our glass is dual-pane with low e-coating and argon gas insulated, making the glass energy efficient. Low-E coatings have been developed to minimize the amount of ultraviolet and infrared light that can pass through glass without compromising the amount of visible light that is transmitted.

Are your systems hurricane-rated?

While our doors and windows are not hurricane rated, the design pressure rating (DP) is 35, which correlates to a 108 MPH wind rating.

How secure are your systems?

We use tempered (safety) glass in all our panels, and our patented wheel technology ensures that the doors cannot be removed from the tracks. Our standard product is lockable from the inside, with keyed options available.

What sizes are available?

All systems are custom-made to order, with a maximum height of 10 feet and a maximum width of 40 feet.

What colors are available?

All systems come standard with black anodized frames and handles.

Are your systems compatible with insect screens?

Yes, with numerous options, both motorized and manual.

Do you offer financing options?

Yes! We offer competitive financing options.

What are your frames made of?

All of our frames are made of Aluminum 6063-T6.

Are your doors and windows for commercial use?

Of course! Conference rooms, restaurants, office partitions, and lounge areas are perfect spaces for our doors.

Is your product Title 24 compliant?

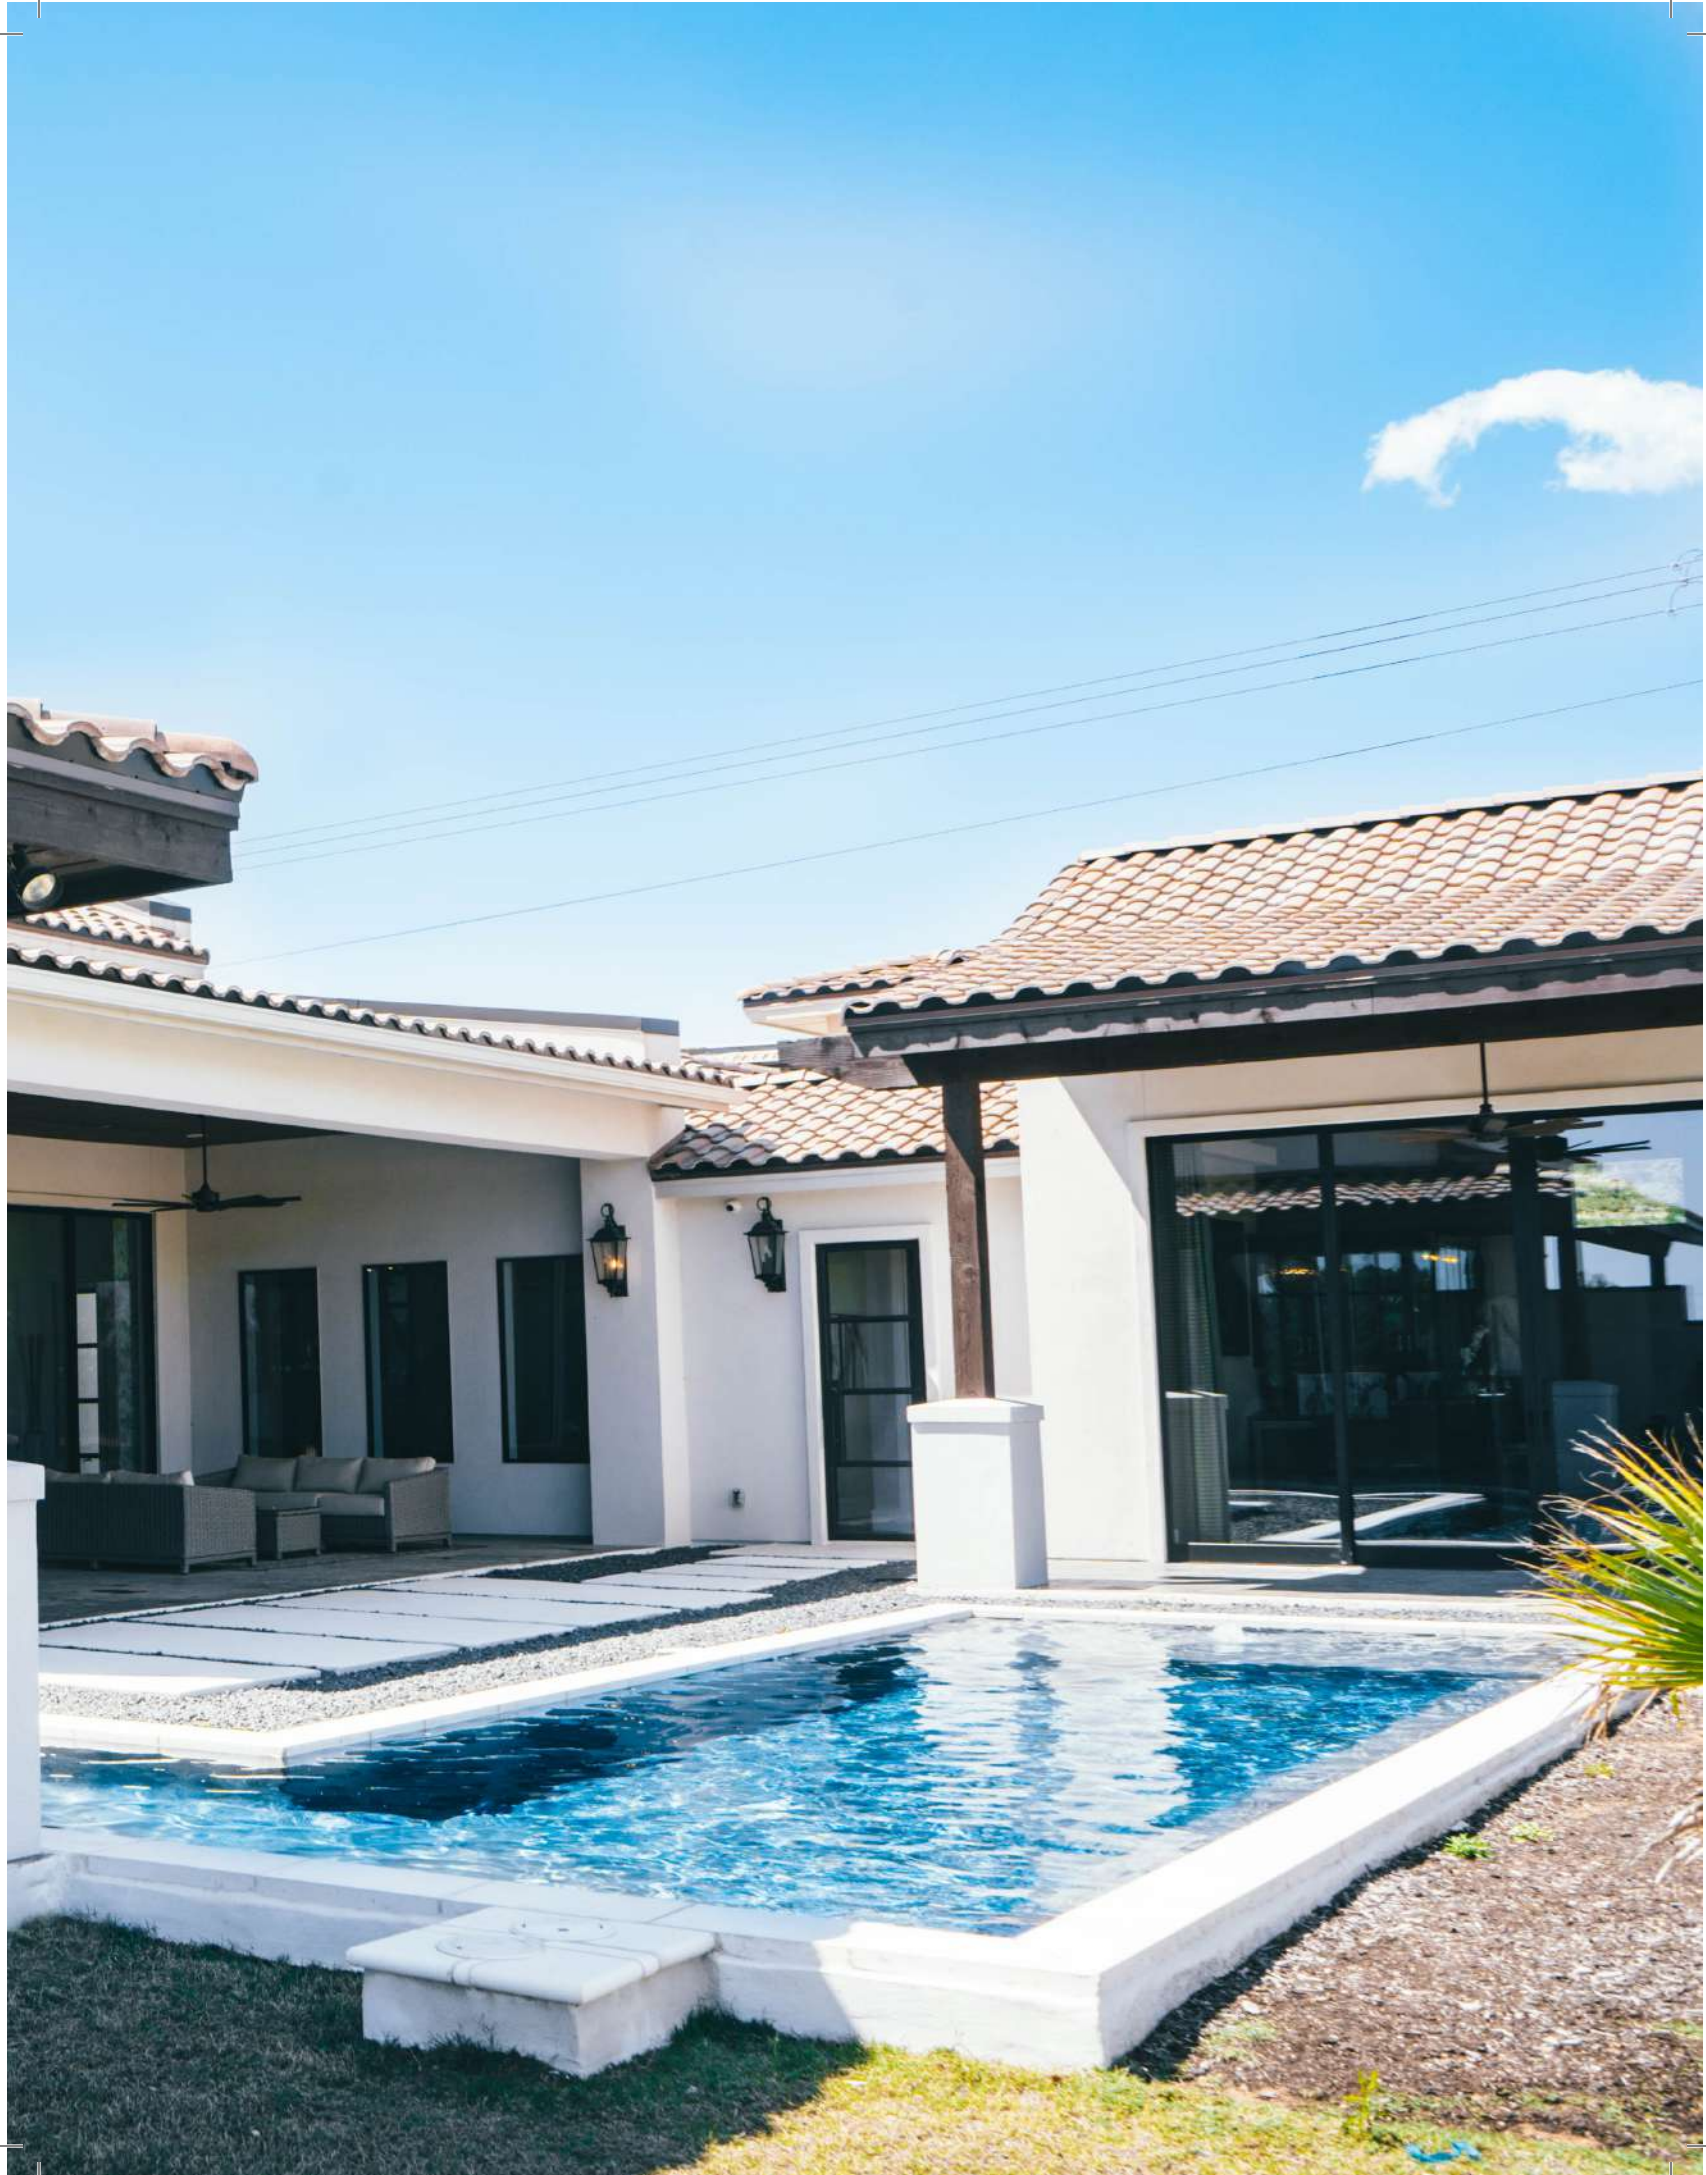

Our product can comply with Title 24 regulations using the performance path.
